Does the title reflect the subject matter of the article?	Yes. The title is relevant for the article content.
The article is clearly written	Agree. The author has done a good job of communicating the content of the review. There are a couple of typos and sentences that could be re-structured for improved clarity but these are minor issues.
The article is well structured	Agree. The structure is logical considering the content of the article.
The article makes a strong contribution to the discussion in its field	Agree. The article is a fair review for the intended audience.
The references are relevant and satisfactory	Agree. The references are relevant and up to date.
The article appropriately uses figures, tables, and appendices	Agree. The figure and table included are relevant and enhance the content of the review.
The contributor is confident about their evaluation	Agree. Based on the content, this seems to be the case.
The subject matter of the article is suitable for an interdisciplinary audience	Agree. This is true as it merges clinical and scientific fields.
Recommendation	I think there could be some minor changes made to enhance the article but there are no major concerns and therefore this can be recommended for publication.
Additional comments	I would like to congratulate the author on their review of this interesting topic and I'm sure it will be of interest to St Anne's readership.
